2705 Halladay St., Santa Ana, CA 92705

Installation of Lateral Arm Awning Systems

All Retractable Awnings will be mounted on fascia boards, and/or exterior walls. Each bracket will be attached to either rafter tails or studs using 5/8" x 5" lags. Each lag will have silicone applied for sealing purposes. All motor wires will be run through conduit and into outside junction boxes, and will use 1.2 amps of power. They will be operated by remote control or an interior switch, and controlled by a sensor, which will automatically retract in a strong wind.

Fabric: Sunbrella – Linen Tweed Frame: White

Valance straight cut with weight stiffener

Installation of Sunscreens

All Sunscreens will be mounted directly above windows or sliding doors. Each housing will be attached by #14 x 2 1/2" lags. Each lag will have silicone applied for sealing purposes, and will attach into the wood framing of the windows or sliding doors. Tracks will attach by #12 x 1" tek screws that will also have a silicone seal. All motor wires will be run through conduit and into outside junction boxes, and will use 1.2 amps of power. They will be operated by remote control or an interior switch.

Fabric: Textile Solar Screen 90% - Brown Frame: White
